

# WTT\_Syzygy Quickstart Guide

---

## Overview

WTT\_Syzygy is a comprehensive trading indicator that combines volume spike detection with support/resistance zone analysis to provide enhanced market insights and trading signals. The indicator's signal generation and optimization algorithms are derived using advanced AI technology to ensure maximum accuracy and reliability.

## Key Features

- **AI-Powered Signal Generation:** Advanced algorithms derived using artificial intelligence for optimal signal accuracy
- **Volume Spike Detection:** Identifies unusual volume spikes with configurable thresholds
- **Support/Resistance Zones:** Dynamic liquidity zone identification with penetration alerts
- **Daily High/Low Tracking:** Optional daily level monitoring
- **Unified Alert System:** Comprehensive alerts for all signal types

## Quick Setup

The indicator comes with optimized default settings that work well for most trading scenarios. Simply add it to your chart and start monitoring for signals.

## Signal Interpretation

### Volume Spike Signals

- **Green Upward Label (Below Bar):** Long signal - Volume spike with bullish price movement
- **Red Downward Label (Above Bar):** Short signal - Volume spike with bearish price movement

### Zone Penetration Signals

- **Red Downward Triangle (Above Bar):** Resistance zone penetration - Price moved >50% into resistance
- **Green Upward Triangle (Below Bar):** Support zone penetration - Price moved >50% into support

### Liquidity Zones

- **Weak:** Low volume strength zones (gray/teal with high transparency)
- **Moderate:** Medium volume strength zones (medium transparency)
- **Strong:** High volume strength zones (low transparency, bold text)

## Trading Applications

### Entry Signals

1. **Volume Spike + Zone Interaction:** Look for volume spikes near support/resistance zones
2. **Zone Penetration:** Monitor for significant penetration into key zones

3. **Daily Levels:** Use daily high/low as additional reference points

## Risk Management

- Volume spikes provide momentum confirmation
- Support/resistance zones offer key levels for stop losses
- Zone penetration alerts help identify potential reversals

## Alert Types

- **Volume Spike Long/Short:** Immediate momentum signals
- **Zone Penetration:** Significant price movement into key levels
- All alerts include ticker symbol and current price

## Best Practices

1. **Combine Signals:** Use volume spikes with zone analysis for higher probability setups
2. **Timeframe Selection:** Works best on 5m, 15m, and 1h timeframes
3. **Market Conditions:** Most effective in trending markets with clear support/resistance levels
4. **Volume Confirmation:** Always confirm signals with volume analysis

## Troubleshooting

- **No Signals:** Check if volume threshold is too high or price change threshold too restrictive
- **Too Many Signals:** Increase volume threshold or price change threshold
- **Zones Not Showing:** Ensure "Show Low Liquidity Zones" is enabled
- **Alerts Not Working:** Verify "Enable All Alerts" is checked in settings

**Version:** Rev1.1 - Enhanced visual indicators with small labels for volume spikes and tiny triangles for zone penetration

**AI-Powered:** Signal generation and optimization algorithms derived using advanced AI technology for enhanced accuracy and reliability.
